

# VillageViewMMT

## TLV/MMT protocol analysis software

- ❑ Detailed analysis of packet parameters
- ❑ Stream composition analysis
- ❑ Extraction of media
- ❑ ARIB STD-B60, STD-B44 Compliant

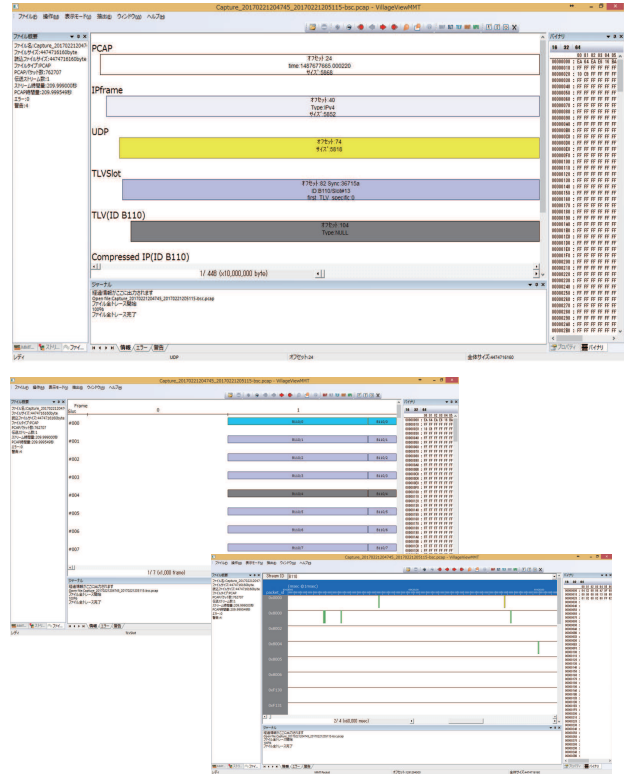

VillageViewMMT is an offline TLV and MMT protocol analysis software .

VillageViewMMT has a GUI that is displayed visually the inclusion relationship (TLV slot to MPU) between layers of the ISDB-S3 transmission method and it can be check the validity to refer to the parameters for packet unit at each layer.

VillageViewMMT can be used easily anywhere at any time as it is a Windows based application.

### 【Features】

- Data search / Display with easy-to-read GUI
- Detailed analysis of packet parameters in each layer of ISDB-S3 transmission system (MMTP, MMT-SI, TLVP, TLV-SI, TLV Slot, UDP, IP) (ARIB STD-B60, STD-B44 Compliant)
- Binary data reference and extraction for each packet
- Analysis for the content (package) configuration information from TLV-SI and MMT-SI included in the stream
- Media extraction in PCAP file or binary format (Single TLV, MMT packet, transmission ES)

### 【Specification】

Supported Formats	PCAP file format • Compound TLV stream • Transaction TLV stream • Single TLV stream • Single MMT stream
Broadcasting Standards	ARIB STD-B60、STD-B44
Function List	• Analysis of packet parameters (MMTP, MMT-SI, TLVP, TLV-SI, TLV Slot, UDP, IP) (ARIB STD-B60, STD-B44 Compliant) • Binary data reference • Analysis for the stream configuration information from • Media extraction (Single TLV, MMT Packet, transmission ES)

### 【PC Recommended Environment】

OS	Windows 10 (64bit) * 「Microsoft Visual C++ 2015 Redistributable(x64)」 is required .
CPU	Intel Core-i3(2.4Ghz) and up
Memory	4G B and up
License	USB dongle
