

RGBlink appoints VILLAGE ISLAND as Distributor for Japan and East Asia

Village Island Appointed as RGBlink Distributor for Japan and East Asia

Tokyo, JAPAN / Fujian, CHINA, July 14th, 2025 – Village Island Co., Ltd. and RGBlink are proud to announce their distribution agreement for Japan, and East Asia. This partnership significantly strengthens Village Island's product portfolio in the ProAV domain, enhancing its ability to serve a wide range of customers across broadcast, enterprise, and creative markets.

RGBlink is a global leader in professional AV processing, streaming, and display control technologies, with recognition for its innovative and accessible video solutions—deployed in over 140 countries. With a robust lineup covering **multiviewers, switchers, signal converters, PTZ cameras, and advanced IP streaming tools (supporting RTMP, SRT, and NDI)**, RGBlink addresses diverse applications in broadcast, live production, control rooms, education, government, and online content creation.

Ben Hu, CEO of RGBlink, announced: *"We are excited to welcome Village Island as our distributor in Japan and a key partner in Asia. Their long-standing expertise **in broadcast and problem-solving, combined with deep customer relationships and technical capacity**, make them an excellent choice to represent RGBlink in these strategic markets. We are confident this partnership will expand RGBlink's visibility and customer base in the region."*

"Partnering with RGBlink is a natural and strategic extension of our mission," said Michael VAN DORPE, CEO of Village Island. *"RGBlink's broad portfolio allows us to address new market segments—including **content creators and YouTubers—with compact, intuitive tools like the TAO series**, while continuing to support high-end applications with **NDI-based systems and multiviewer solutions**. Importantly, this collaboration complements our current offering without overlapping with existing brands, allowing us to offer more complete solutions to our partners and clients across Asia."*

He adds: *"Our team also bring valuable experience in control room integration, which aligns well with RGBlink's video controllers and signal processing solutions."*

RGBlink products will be showcased at major trade shows across Asia, including the upcoming InterBEE (Japan) and BroadcastAsia / ATxSG (Singapore). Village Island will also coordinate on-site demonstrations, system integration, and custom solution building in response to customer needs—ensuring that RGBlink technology is accessible, scalable, and tailored to local market requirements.

Company Profiles

About Village Island

Founded in Tokyo, Japan, Village Island Co., Ltd. is a leading solution provider and distributor in the broadcast, ProAV, and telecommunications sectors across Asia. With decades of experience in compressed video, IP transport, and multiviewer systems, Village Island supports clients ranging from major broadcasters to government agencies and AV integrators. The company combines technical excellence with a regional distribution network and customer-centric service to deliver robust, reliable solutions.

About RGBlink

RGBlink is a global manufacturer of professional video processing and AV signal distribution technologies. With a mission to “empower video everywhere,” the company provides an extensive ecosystem of products including switchers, scalars, encoders, presentation systems, and NDI-ready devices. Backed by strong R&D and a global partner network, RGBlink serves users in over 140 countries across broadcast, live events, education, government, corporate AV, and content creation.
